

Our Vision

||

Every person will enjoy optimal brain health throughout life.

About The Brain Center

The Brain Center is a non-profit, high-impact organization committed to making brains better. The Brain Center is a community resource and local “hub” for brain diseases and conditions. Our work is guided by the C.A.R.E. approach - Collaborate, Advocate, Research, and Educate.

COMMUNITY OUTREACH

The Brain Center is an educational resource for community partners, including schools, employers, churches, retirement facilities, community centers, nonprofit agencies, and groups seeking to learn more about optimizing brain health.

I'm so very thankful to have found the Brain Center of Green Bay! When I leave my Neurologist's office, I feel sad and lonely and like I've taken a step backward. When I leave a meeting with Julie, I feel happy, capable, and enlightened. Thank you so much.

PERSONALIZED COACHING

Our Personalized Coaching Services are a partnership between the coach, client, and their care partner to help navigate through a diagnosis, maximizing their brain health and wellness and overall quality of life.
